

PRECISION ROLL SORTERS

CDS Manufacturing designs and builds a standard line of Precision Roll Sorters. Our precision roll sorters (also referred to as roller sorters) include a pair of .000005" TIR case hardened stainless steel rollers. This very accurate system is perfect for precise tight tolerance sorting and are capable of sorting to within **20 MILLIONTHS OF AN INCH !!**

Customize your roll sorter to meet your specific application with rollers ranging from .002" TIR to rollers with 5 MILLIONTHS TIR!

Our +/- .002" TIR roll sorter system is great for simpler applications such as mixed parts, debris, and loose tolerance sorting applications.

Base mounted, pedestal mounted, and table top units are available.

Choose the roll sorter that is right for your application. We can equip your roll sorter with a custom feeder system built specifically for your parts and additional equipment including a laser inspection system, vision inspection system, and good / reject part gating system.

Sort for mixed parts, length, diameter, thickness, height, foreign materials, debris, and more.

Contact us today for a free consultation with one of our sorting experts.
