

STEP FEEDERS

CDS LIPE Manufacturing's Step Feeders are perfect for gentle feeding and presentation of parts for automatic assembly, automatic inspection, automatic sorting, or secondary operations. These versatile step feeders are used heavily in the automotive industry and known for their gentle feeding, flexibility, efficiency, and day to day reliability.

Optional Equipment:

Contact us today with your specifications for more information about our Step Feeders. **CDS LIPE Manufacturing** can provide Step Feeders with a wide range of options and additional equipment, including; auxiliary hoppers, automatic laser inspection equipment, vision systems, eddy current inspection equipment, precision roll sorting equipment, pick & place equipment, robotics, and more.

The Step Feeder system shown here includes a conveyor, vision system, and good / reject part gating system. This system feeds, orients, and inspects four different couplings at a rate of 80 parts per minute.

Step Feeders Features:

- Quiet Operation
- Lower Maintenance
- Metered Feeding
- Gentle Handling
- Vibration Free Feeding
- Low Load Height
- Handles Oily and Contaminated Parts
- Feeds a Wide Variety of Parts
